Stack Qty Empty (Folded)	3

Construction

Heavy duty Galvanised steel construction, manufactured from heavy gauge steel for the most demanding environments.

Handling

Forklift truck and pallet truck.

Transport

The dimensions of H:808mm x L:1000mm x W:600mm and a 7 degree slope make this unit ideally suited to liquid product that do not flow easily.

The slope can be removed easily to give a flat base making it suitable for dry goods and stacking of components.

Storage

Pallet Racking compatible

Self stacking

Advantages

The 250S Galvanised Steel bolted construction bag-in-box is a low cost rental option for the transport and storage of liquid and dry goods, compatible with products such as SCM, fruit juice, dairy products and cosmetics.

The 250S has a capacity of over 250 litres, is built to last and has unrivalled strength.

Easy to assemble, fill and discharge.

Large outlets aid product discharge.

Slim design allows easy transit through narrow doorways.

Metano Liquid Liners

2" and 3" cutter membrane and 2" and 3" butterfly valve liners. Available in 3 ply LLDPE, can be manufactured with intermediate barrier layers if required.

All Liners are manufactured by Metano to the highest standards in our BRC approved ISO validated clean room.

All Metano rental units are reusable and can be recycled at the end of life. Metano can offer a truly sustainable cradle to grave rental solution for all your liquid packaging needs.
